

kershaw®

2 0 1 6

Kai USA, Ltd., founded as Kershaw Knives in 1974, began with one mission: to design and manufacture tools that knife users would be proud to own, carry, and use. Today, premium materials, state-of-the-art manufacturing, extremely tight tolerances, and meticulous craftsmanship ensure that each Kershaw knife or tool provides a lifetime of performance and pride of ownership. The Kershaw brand is especially known for innovative technologies and materials, resulting in numerous industry awards. We manufacture many of our products in our 55,000 sq. ft. facility located south of Portland Oregon, in the city of Tualatin. Our campus houses a state-of-the-art manufacturing facility, our design, engineering, and manufacturing teams, as well as the customer service experts who sell and support our Kershaw brand knives and tools. Kershaw products are backed with a Limited Lifetime Warranty.

We reserve the right to change materials and specifications without notice.

kershaw®

WHAT ARE YOU CARRYING?

It's not a question of whether you carry a pocketknife. You already know there's nothing like a pocketknife to tame any cardboard box or liberate any purchase from its plastic packaging. You're the one they're asking when they say, "does anybody have a knife?" You've cut tags off of clothing, portioned apples for lunch, opened mail, cut duct tape, removed splinters, sharpened pencils, and cut zip ties. So, yeah. You already know having a knife on you is useful.

The question is: *which* knife are you carrying?

It should be the one that gives you plenty of bang for every hard-earned buck, on every budget. It should feel good in your hand, solid and reliable. It should be a tool you can count on for award-winning technologies, advanced materials, and meticulous state-of-the-art manufacturing. Of course, it should offer you innovative design, top quality, a truckload of value, and genuine pride of ownership.

Quite simply, it should be a Kershaw.

DECOY
4700
P.43

GRID
2200
P.32

In the handle of our new Decoy utility knife (▲) is a handy pair of pincers. Use the slider to easily pinch and hold small objects. The new Grid (◄) is a larger knife with a tactical vibe, a modified drop-point blade, and dark good looks.

Yes, we have new autos. The Launch series has been so successful that we've added to it. We now have a California-legal model (▼) and a Launch with an aggressively tactical look (►).

LAUNCH 6
7800BLK
P.10

LAUNCH 4
7500BLK
P.10

GRINDER
1319
P.13

BARGE
1945
P.47

Kershaw makes work knives that work. The new Grinder (▲) offers a work-ready edge and a concave spine for extra grip when bearing down on a task. The Barge's (◄) built-in pry bar means now you can pry with your knife—no harm, no foul.

Emerson design meets Kershaw auto-magic to create your next must-have knife: the new Launch 5 (◄).

LAUNCH 5
7600
P.10

CINDER
1025
P.47

The Cinder (▲), designed by Rick Hiinderer, is your new small knife buddy. Plenty of style and cutting power—and yes, it has a bottle opener. For gentlemanly style for the unconventional gentleman, check out Todd Rexford's new Showtime (►).

SHOWTIME
1955
P.31

Classy new EDC styles. With its contoured handle and practical blade, the Kershaw Intellect (◄) is an intelligent choice. But then so is the sophisticated new Westin (►), designed by Les George.

INTELLECT
1810
P.32

WESTIN
3460
P.36

IDENTITY
1995
P.37

The new Identity (▲) offers a tactical look, but it's a tactical look with a difference. The Cathode (▼) has a clean, tanto look at a very practical price.

For 2016, Danish custom knife and toolmaker Jens Anso and Kershaw teamed up to create an affordable version of Jens' wildly popular multi-function carabiners (▼).

CATHODE
1324
P.13

JENS CARABINER
1150
P.69

INDUCTION
1905
P.43

The Hawk Lock is back—on the new Kershaw Induction (◀). And Les George brings his real-world experience to bear on the new tough-duty-ready Valmara (▶).

VALMARA
3480
P.32

RATION
1140
P.69

In the “handy tools” category, Kershaw offers the new Ration (◄). It’s great for anyone who camps, hikes—or grabs lunch at a desk. Also very handy is the no-nonsense Entropy (►), designed by Todd Rexford.

ENTROPY
1885
P.32

Practicality comes in all sizes. The new Payload (▼) offers an onboard 5-bit screwdriver set as well as a big, beefy utility blade. The Spoke (►) is a small knife with big cutting capabilities.

SPOKE
1313BLK
P.13

PAYLOAD
1925
P.47

The barracuda sleek Ferrite (►) is a new design from Rick Hinderer. The blade offers a deep contour on the spine and a front swedge that adds a great look and slims the blade for excellent piercing.

FERRITE
1557TI
P.38

SPLINE
3450BW
P.36

What's a "Spline"? It's a handsome new knife (▲) from Kershaw and Les George, based on Les' Mini Harpy. Also coming in 2016 is our Fatback, which is one very tasty new knife (►).

FATBACK
1935
P.36

CQC-9K
6045BLK
P.17

If you prefer your Kershaw-Emersons on the larger side, get ready for the CQC-9K (◄). It's one of the biggest of the bunch and offers maximum Emerson look-and-feel as well as maximum Kershaw build quality.

PICO
3470
P.33

An EDC should be practical and draw admiring glances when you take it out of your pocket. We offer three excellent options: the Pico, from Kershaw and Les George (▲), the Rove (►), and the Portal (►►).

ROVE
1965

TEAM Kershaw®

These are some of the people we admire. We admire their dedication to their sport. We admire their dedication to sharing it with others. We admire how they put Kershaw knives to use as a part of their lives. They also help us demonstrate how important Kershaw knives are—in every day life as well as in naturally knifeheavy sports like hunting. They help us get our brand out before a variety of key knife-buying audiences and even help us introduce the Kershaw brand to new audiences. It's not an easy job. It's definitely worthy of admiration. And it's why we're so proud to sponsor these terrific teams, organizations, and individuals.

BLADE STEELS

SANDVIK 14C28N

This high-performance steel was developed in a partnership between Kershaw and Sandvik Steel. Offers excellent corrosion resistance and the ability to be hardened to 58-60 Rockwell.

8CR13MOV

Kershaw precision heat-treats 8Cr13MoV steel to bring out its very best high-performance characteristics: the ability to take and hold an edge, strength, and hardness.

8CR14MOV

The formula for this steel has additional chromium for added stain resistance. It also benefits from Kershaw's expertise in precision heat treatment.

420J

Highly stain resistant, but ductile, this steel is excellent for use where "flex" is desirable, for example, in fillet knives.

420HC

This modified 420 steel has higher amounts of carbon and chromium to boost hardenability and corrosion resistance. It is an excellent everyday steel: tough, corrosion resistant, easy to sharpen and takes a good edge.

CPM154

This powdered metallurgy steel has a more uniform distribution of carbides so it takes and holds an excellent edge. Also offers good corrosion resistance, wear resistance, and toughness.

S30V

All-around premium knife steel takes and holds an edge extremely well and is also very tough and wear resistant.

D2

This "semi-stainless" tool steel is known for excellent wear resistance and good toughness.

65MN

A tough, durable carbon steel designed for hard-use applications such as Kershaw's Camp Series machetes.

3CR13

A value-priced high-chromium stainless steel.

4CR13

A value-priced steel; very highly stain resistant.

BLADE FINISHES & COATINGS

BEAD-BLASTED FINISH

The knife blade is “blasted” or sprayed with a mixture of fine media, including glass and aluminum oxide beads, under high speed and pressure. This smooths the blade surface and creates a soft, non-reflective, matte look. Depending on the media, this finish can produce a darker or a lighter blade color.

BLACK-OXIDE COATING

A chemical bath converts the surface of the steel to magnetite; it enhances appearance and adds some corrosion resistance.

BLACKWASH FINISH

Our BlackWash finish produces a vintage look like that of well-used tool or favorite, broken-in pair of jeans. Kershaw products may have DLC BlackWash or black-oxide BlackWash finishes.

DLC COATING

Diamond-Like Carbon (DLC) coating displays properties similar to those of natural diamond, including hardness, wear resistance, and reduced friction.

DUAL FINISH

Sometimes Kershaw will combine two different blade finishes on a single blade, for example, satin finish on the blade upper and stonewash on the lower part of the blade.

POWDERCOAT

The coating is applied as a fine powder and cured under heat. This creates a smooth, even, and tough coating.

SATIN FINISH

A Kershaw satin finish will typically show a faint pattern of vertical lines across the blade. It is a shinier finish than bead blasting and somewhat lighter in color.

STONEWASHED FINISH

Blades are tumbled with ceramic “stones,” which gives the blade surface a desirable roughened or scuffed look. The look can be pronounced or subtle. The finish helps hide scratches and fingerprints.

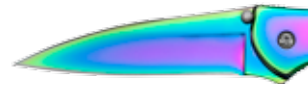

TITANIUM CARBO-NITRIDE

Kershaw also uses titanium carbo-nitride to produce an attractive black or grey blade coating that increases the blade’s hardness, helps maintain the edge, and increases the lifetime of the blade.

TITANIUM OXIDE

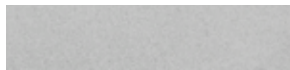

When oxygen is introduced into the PVD process, the result is Kershaw’s spectacular “rainbow” finishes. The Rainbow Chive, Scallion, and Leek feature this multicolored finish.

HANDLE MATERIALS

ANODIZED ALUMINUM

Anodizing makes aluminum stronger and enables Kershaw to add scratch and fade resistant color to knife handles.

CO-POLYMER PLASTIC

A co-polymer is a compound of two or more different molecules, chosen for specific characteristics. The co-polymers Kershaw uses for knife handles generally have a slightly rubbery texture to improve grip security.

G-10

An epoxy-filled woven glass fiber; it is extremely stable, unaffected by temperature changes, and makes excellent handles and handle scales for knives.

GLASS-FILLED NYLON

Nylon synthetic polymer is reinforced with glass threads for increased strength, stiffness, and dimensional stability combined with excellent wear resistance.

K-TEXTURE GRIP

An exclusive texture and pattern used on the handle of certain Kershaw knives. K-Texture enhances a secure grip.

STAINLESS STEEL

An alloy of iron and carbon, most steel also has additional elements alloyed in it to enhance specific characteristics. As a handle material, steel is strong and attractive.

TRAC-TEC INSERTS

A rough-surfaced insert that provides additional friction for a non-slip grip.

LOCKS

FRAME LOCK

In a frame lock knife, the knife handle—its “frame”—consists of two plates of material on either side of the blade. When the knife is opened, one side of the frame butts up against the backend of the blade and prevents the blade from closing until released. The thickness of the frame material blocking the blade open makes the frame lock extremely sturdy.

HAWK LOCK

The Hawk Lock uses a principle similar to other locks to secure the blade open. But instead of part of the frame or liner moving into place, a spring-loaded latch plate in the knife handle moves to contact a steel pin on the blade, locking the blade open. To close the knife, just pull the lock slider toward the butt of the knife and fold the blade back into the handle.

INSET LINER LOCK

The Inset Liner Lock is a Kershaw variation on the liner lock. Kershaw insets a sturdy steel plate on the inside of the knife's handle. It is riveted into place in a custom-machined cutout on the interior of the handle. This enables us to make a knife with a slimmer profile that won't weigh your pocket down, while still providing the strength and security of a locking liner.

LINER LOCK

The most common of today's blade-locking systems. The handle consists of two metal plates (the “liner”) on either side of the blade. When the knife is opened, one side of the liner butts up against the backend of the blade and prevents the blade from closing until released. A secure and convenient way to make using a Kershaw folding knife even safer.

LOCK BACK

The oldest of the popular blade-locking systems, yet the principle is the same as with the others. Once the knife is opened, a steel bar locks into place behind the blade and prevents the knife from closing until released by the knife user.

PUSH BUTTON LOCK

Like Kershaw's other locking systems, once the blade is open, a mechanism blocks the butt end of the blade and prevents it from closing accidentally. In this case, a spring-loaded lock is built into one side of the handle that must be depressed in order to unlock the blade.

SUB-FRAME LOCK

The Kershaw sub-frame lock is a variation on the traditional frame lock. In this case, a piece of a lighter weight frame, like G-10, is machined out and a piece of steel is riveted into its place. This steel acts like a standard frame lock. It enables us to make a knife with a slimmer profile, while still providing the strength and security of a frame lock.

TIP-LOCK

The tip-lock can be found on all Leek, Scallion, and Chive SpeedSafe knives. It's a simple slider that, when engaged, ensures the blade will not accidentally open. It's especially helpful in cases where the knife might be juggled in a briefcase, backpack, or purse.

POCKETCLIPS

SINGLE-POSITION

The pocketclip is mounted in a single, fixed position on the knife handle.

REVERSIBLE

Right-handed, tip-up or tip-down
OR
Right- or left-handed, tip-up

3-POSITION

Right-handed, tip-up or tip-down
AND
Left-handed, tip-up

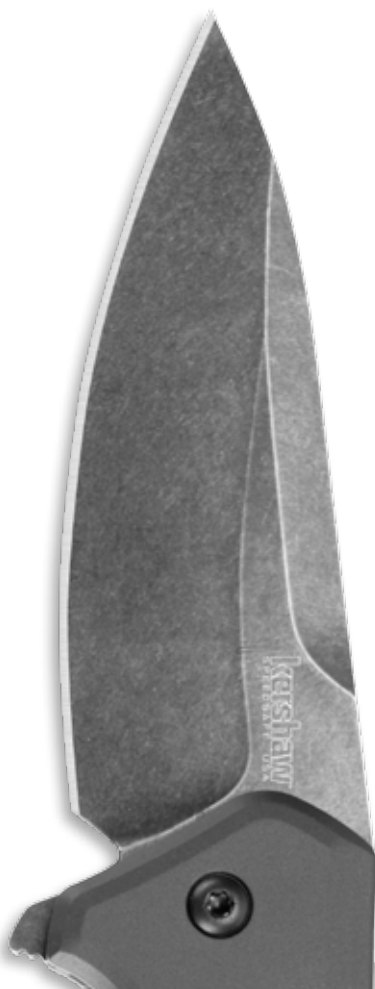

4-POSITION

Right-handed, tip-up or tip-down
AND
Left-handed, tip-up or tip-down

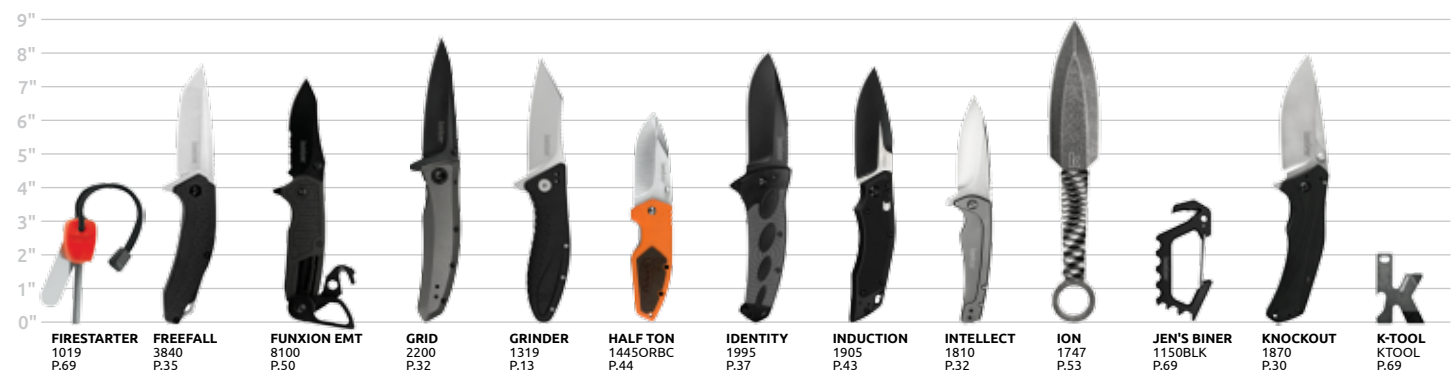

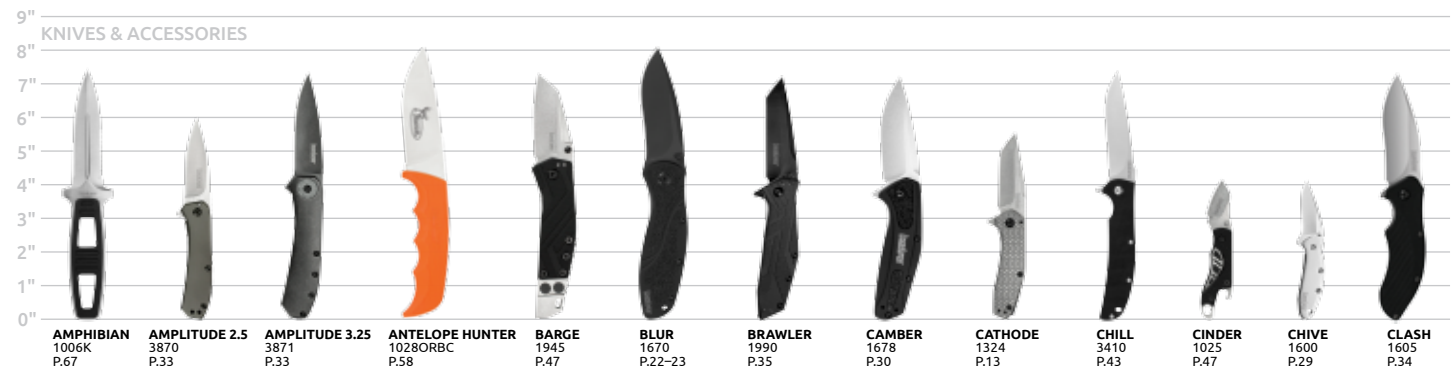

DEEP-CARRY

This specially designed pocketclip is positioned at the very end of the handle so that the knife can be carried deeper inside the pocket.

LIMITED LIFETIME WARRANTY

Kershaw Knives from Kai USA Ltd. carry a limited warranty for the lifetime of the original owner, except when stated otherwise. We guarantee our knives against manufacturing defects in material and construction and to perform as advertised when properly used and maintained. The Limited Lifetime Warranty is non-transferable and does not extend to normal signs of wear, rust, damage or breakage due to improper use, improper maintenance, accidents, loss or theft. Any product we determine to be defective will be repaired or replaced solely at our discretion. To receive warranty repair or replacement, the owner must send the product to be evaluated by Kai USA Warranty Services in our Tualatin, Oregon headquarters. In addition to the provisions of this warranty, the owner may also have other rights that can vary by state. The Limited Lifetime Warranty does not apply to the TX Tool. No other warranties are implied or expressed other than what is specifically stated here. If you accidentally break your Kershaw folder's blade, we can replace it for just \$10. Blades that break due to a manufacturing defect will still be replaced under warranty, free of charge.

LIABILITY DISCLAIMER

Kershaw Knives are intended and sold for legitimate sporting and/or culinary purposes only. The purchase, use, and ownership of knives are subject to a wide variety of local laws and regulations. Due to the complexity and constantly changing nature of these laws and regulations, it is the responsibility of the buyer to investigate and comply with the laws and regulations that apply in his or her specific area. You, and not Kai USA Ltd., are solely responsible for any claims resulting from violation of these laws and/or regulations. Any use of these products other than cutting is considered misuse and abuse. Kai USA Ltd. is not responsible for any injuries or damages caused by misuse and/or abuse.

WARNING!

Knives are extremely sharp tools and should only be used or handled with the utmost care and caution. Any use other than cutting is considered misuse and abuse—and will void your warranty. Kershaw Knives/Kai USA Ltd. is not responsible for any injuries resulting from misuse or abuse of the product.

We reserve the right to change materials and specifications without notice.
